6. Please explain your rating above regarding academic integrity of AI use for this submission. Why? (Write in 2-3 sentences) *

There are quite a few things that I haven't done before in this project, and I doubt I'm the only one. Using AI allows us to learn how to do those things.

7. How did using AI content generators impact **your learning** for this submission?

8. Please explain your rating above about AI's impact on your learning for this submission. (Write in 2-3 sentences, input N/A if you have not used any) *

Without the help of AI, I'd be very clueless as to how to integrate the API I was responsible for. It also helped me here and there with some minor CSS issues.

9. For this submission, how would you rate the relative contribution made by your versus AI? *

	Entirely by myself, no contribution from AI	Mostly by myself, some contribution by AI	Evenly split between myself and AI	Mostly by AI, some contribution by myself	Entirely by AI, no contribution from myself	Fair

10. List all the **AI tools** AND the **specific prompts** you used for this submission (input N/A if you have not used any) *

I used chatGPT for the following prompts:

"Generate a lesson plan for me for lesson X - lesson-name" where X was the lessons number and lesson-name was what I wanted the lesson to be about.

"I have this setup for my OpenAI API, how can I make it so that it generates an answer based on

user response?"

"I have this setup for my OpenAI API, how can I make it so that it generates related questions based on the user response"

"I'm having trouble centring this element on my web application using CSS. Can you help me?"

11. How confident were you in AI's responses that you received? *

- ☐ Confident
- ☒ Somewhat confident
- ☐ Neutral
- ☐ Somewhat not confident
- ☐ Not confident
- ☐ I did not use AI for this submission

12. How did you ensure the answer you received from the AI tool was correct? (input N/A if you have not used any) *

For the CSS questions, they would sometimes be useful, other times not so much. I knew whether or not they were correct by simply testing them. For our lesson plans, I know a decent amount of React, so when reviewing the plans generated by the AI, I double checked that it measured up to what I know, while also comparing it with other resources online. For the OpenAI API, I simply just tested the code it gave me.

13. Did you at any point abandon using AI tools and seek other resources? Explain your answer. *

What made you abandon using the AI tool? Were you more successful using other resources? Input N/A if you have not used any

I was trying to figure out how to implement a side navigation bar on the content page, and the AI wasn't helping me with that, so I resorted to reading other articles.

15. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

As mentioned before, I relied pretty significantly on AI to help me create the content modules, so that's why I have the writing portions more towards the AI side. For code, I wrote it all myself aside from some portions of the API implementation.
